- 5% have a PhD
- 98% have a degree

**Level in profession**

- 21% C-Level
- 54% Senior Management
- 18% Middle Management

Communities of Practice | Our blended approach

Comments from our students

**Graham Wright, Group Managing Director of Microsave,**  
*"I have been really impressed with this course, the overall experience has been incredibly fulfilling in terms of insights gained and the level of engagement with faculty and peers alike throughout the 12 weeks. The course provides a great high level overview of a complex landscape that allows practitioners to see the big picture before moving on to understand the operational details."*

**Parminder Pal Singh Sandhu, Joint Secretary, Aadhar Project, Punjab,**  
*"An intensive and interactive course, comparable to the best of my graduate level courses at Harvard as both the students and the teachers were practitioners of the subject."*

**Vincent Mutai, Digitisation of Government Payments Task Force Kenya,**  
*"The rich discussions on a range of topics in digital financial services throughout the 12 weeks greatly helped fill my knowledge gaps. Now, I have a deeper understanding of how various elements within the digital payments ecosystem interrelate. I also feel more confident engaging in conversations on matters concerning digital financial services."*
